

Optima PRO

FEED FOR SHRIMP

Optima PRO is a truly exceptional shrimp larval and post-larval diet. It provides industry leading survival rates and weight gain.

It has an exceptional water stability for maximum feed consumption and minimum nutrient leakage, feeding the shrimp and leaving the water clean.

Optima PRO is formulated and produced to mimic the features of live food. Microcapsules ensure a low leaching rate and low nutrient loss. The product has outstanding digestibility ensuring a high performance.

Optima PRO is naturally buoyant, always available in the water column and perfectly water stable. Optima PRO provides an exceptional palatability.
